Re: Timber Harvest- 105R & 125 Old Colchester Road, Waterford, CT

Mr. Harmon,

At their meeting conducted on July 27, 2023, the Waterford Conservation determined that the referenced timber harvest activity and the use of a temporary timber bridge and corduroy crossing of an intermittent watercourse and wetlands meets the criteria for a permitted use under Section 4.1a of the Waterford Inland Wetlands and Watercourses regulations.

The following best management practices are recommended to protect inland wetlands and watercourses on the site from direct and secondary impacts associated with the proposed harvest:

1. Install corduroy approaches at the temporary stream crossings to minimize disturbance to the stream channel and embankments;
2. Upon completion of the timber harvest, remove the temporary crossings and approaches and smooth ruts in disturbed soils to pre-existing grades. Seed and hay exposed soil areas on skid trails and haul routes.

Please notify this office at the completion of the harvest activity to schedule a site inspection to review site stabilization. If you have any questions, do not hesitate to contact me at 860 444-5813.

Sincerely,

  
Maureen FitzGerald  
Environmental Planner
